126mm

Actual size
Weight 50g

80mm

Specially constructed pincher head

The specially shaped narrow tip lets you firmly grip bones and easily remove them.

A handle shape to suit the job

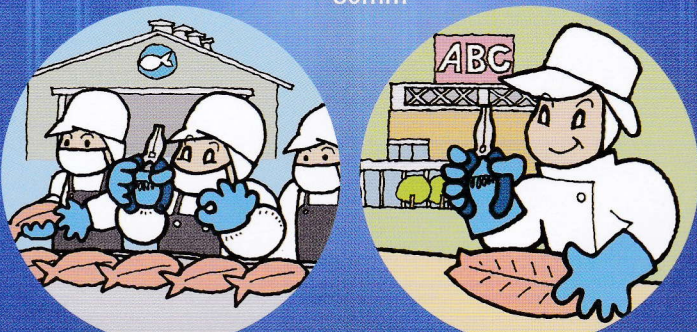

The handle is easy to grip and slip-resistant which reduces fatigue and makes it easier to hold, increasing work efficiency.

Leaves flesh intact

The specially designed curved tip pushes down the flesh and makes it easy to remove the bones leaving the fish intact.

It can be removed for thorough cleaning

You can take off the spring and remove the handle to enable thorough cleaning for better sanitation. It is made of stainless steel to be sanitary with a long service life.

Food processing plants, supermarkets, hotels, restaurants, etc.

1 Remove spring and open 2 Disassemble 3 Wash
